

## **Heavy Oil Specialist Group at SPE - Chair/Lead Job Description**

Are you passionate about heavy oil production? Do you enjoy networking and connecting with like-minded professionals? If so, we're looking for a chair/lead to join our Heavy Oil Special Interest Group at SPE.

As a chair/lead, you will be responsible for organizing and hosting luncheons for the Heavy Oil Special Interest Group. You'll have the opportunity to connect with industry leaders and experts, stay up to date with the latest technological advancements, and shape the conversation around important topics in heavy oil production.

In this role, you'll be a natural leader, able to inspire and motivate your team to achieve great things. You'll have excellent communication and networking skills, able to connect with stakeholders and build relationships with industry partners.

If you're passionate about heavy oil production and want to make a difference in your industry, we encourage you to apply to become the chair/lead of our Heavy Oil Special Interest Group at SPE. Let's work together to advance our industry and drive meaningful change!

### Responsibilities

- Organize and facilitate luncheons for the Heavy Oil Special Interest Group, featuring expert speakers and presentations on relevant industry topics.
- Collaborate with other SPE groups and industry partners to promote the Heavy Oil Special Interest Group and increase membership.
- Stay up to date on the latest technological advancements, industry trends, and regulatory changes in heavy oil production.
- Provide leadership and guidance to the Heavy Oil Special Interest Group, encouraging active participation and engagement among members.

### Qualifications

- Bachelor's degree in petroleum engineering, Chemical Engineering, or a related field.
- Preference given to candidates with extensive experience in the heavy oil production industry, with a strong understanding of industry trends, challenges, and opportunities.
- Strong leadership and communication skills, with the ability to inspire and motivate a team of professionals.
- Experience in event planning and execution, with a focus on creating engaging and informative experiences for attendees.
- Excellent networking and relationship-building skills, with the ability to connect with industry partners and stakeholders.
- Familiarity with SPE's organizational structure, mission, and values.
- Passion for the industry and a desire to contribute to its growth and advancement.

## **Production & Facility Specialist Group at SPE - Chair/Lead Job Description**

Are you a production and facility design enthusiast who loves connecting with other like-minded professionals? If so, we have an incredible opportunity for you!

We're searching for a driven and passionate chair/lead to join our Production & Facility Special Interest Group at SPE. In this role, you'll be responsible for organizing and hosting luncheons that bring together industry leaders and experts to discuss the latest technological advancements in production and facility design.

As a natural leader, you'll have the chance to motivate and inspire your team to push the boundaries and achieve great things. You'll be an excellent communicator with exceptional networking skills, able to forge strong relationships with industry partners and stakeholders to shape the conversation around crucial topics in production and facility design.

If you're a true production and facility design aficionado with a passion for driving change in the industry, then we encourage you to apply to become the chair/lead of our Production & Facility Special Interest Group at SPE. Let's work together to make a real difference and revolutionize the way we approach production and facility design!

### Responsibilities

- Organize and host luncheons events to bring together industry leaders and experts to discuss the latest trends, challenges, and opportunities in production and facility design.
- Serve as the face of the Production & Facility Special Interest Group, networking with stakeholders and building strong relationships with industry partners to ensure the success and growth of the group.
- Work with the group's executive committee to plan and execute a strategic vision for the group's future, including initiatives to expand the group's reach and impact within the industry.
- Collaborate with other SPE special interest groups to share knowledge and resources and drive cross-disciplinary innovation.
- Stay up to date with the latest technological advancements in production and facility design and share this knowledge with the group's members to promote continued learning and development.
- Help to identify and recruit new members to the group and promote active participation and engagement from all members.

### Qualifications

- Strong experience in production and facility design, with a solid understanding of industry trends, challenges, and opportunities.
- Excellent leadership skills, able to inspire and motivate a team towards a common goal.
- Strong communication and interpersonal skills, able to effectively network with stakeholders and build relationships with industry partners.
- Passionate about advancing the industry and driving meaningful change through collaboration and innovation.
- Ability to work collaboratively with others and maintain a positive and inclusive work environment.
- Strong organizational skills, able to manage multiple priorities and initiatives simultaneously.
- Active participation in SPE or other relevant industry organizations is preferred.
- Bachelor's or master's degree in engineering or a related field is preferred.
